EDUCATION

University of Engineering and Technology
BS Computer Science

September 2020 - September 2024

Final Year Project: The project follows a phased approach, starting with the design and development of a university website using micro-services architecture, leveraging technologies. Additionally, a machine learning model will be created using historical website traffic data to predict future traffic levels.

EXPERIENCE

Freelancing

October 2022 - Present

- **Gaztron** (*AngularJS, NodeJS, MongoDB*)
India's leading manufacturer of high-quality On-Site PSA Nitrogen & Oxygen Gas Generator Plants. Contributed to the development and maintenance of their web platform.
